

FIRMWARE CERTIFICATE

We confirm that firmware version: 3P4W, 10(100)A, 230V, GPRS-250625.01, used in the Three Phase GSM Meter (Model: D5A5003) supplied to M/S WOSCO Metering (Pvt.) Ltd., has been developed by Zhejiang Yongtailong Electronic Co., Ltd.

The firmware has undergone extensive internal testing in accordance with international metering standards, including IEC62053-21:2003 and DDS65:2003, and is currently in the process of adaptation to IEC62053-21:2020. No critical bugs have been identified in the current release.

The firmware is designed to protect metering data such as kWh and MD against unauthorized modification unless the meter's physical security (e.g., sealed terminal cover or enclosure) is breached.

This statement is based on our testing and quality assurance procedures as of the release date. Zhejiang Yongtailong shall not be held responsible for misuse, unauthorized access, or tampering by external parties.
